

CANOLA OIL SPECIFICATION

INPUT NAME

REFINED CANOLA OIL

GENERAL FEATURES

Food must have a certificate of conformity
It should not contain genetically modified organisms

CHEMICAL PROPERTIES					
Free Fatty Acids(In oleic acid)	max 0,3				
Peroxide content (meq - g / kg)	max 10				
Quantity Soap	max 0,005				
Number of Iodine	105-126				
Inhalant % m / m	max 0,2				
Number of saponification	182-193				
Unsaponified Article	max 20				
Insoluble Impurities	max 0,05				
Foreign Oil	will not				
mineral Oil	will not				
Iron	<1,5 ppm				
Arsenic	<0,1 ppm				
Lead	<0,1 ppm				
Nickel	<0,2ppm				
Copper	<0,1ppm				
Aflatoxin	<10ppm				
FATTY ACID COMPOSITION (% in methyl ester m / m)					
Lauric acid(C12:0)					
Myristic acid(C14:0)					max.0,2
Palmitic acid(C16:0)					2,5-7,0
Palmitoleic acid(C16:1)					max.0,6
Heptadecanoic acid(C17:0)					max.0,3
Heptadeceneoic acid(C17:1)					max.0,3
Stearic acid(C18:0)					0,8-3,0
Oleic acid(C18:1)					51,0-70,0
Linoleic acid(C18:2)					15,0-30,0
Linolenic acid(C18:3)					5,0-14,0
Arachidic acid(C20:0)					0,2-1,2
Gadoleic acid(C20:1)					0,1-4,3
Ekosadienoik asit (C20:2)					max.0,1
Behenic acid(C22:0)					max.0,6
Erusic acid(C22:1)					max.2,0
Lignoceric acid(C24:0)					max.0,3
Nervonic acid(C24:1)					max.0,4

PHYSICAL CHARACTERISTICS

Visual: Clear, in impurities will not .

Microbiological Properties

PACKAGE FEATURES

Products shipped in bulk , in stainless steel tanks with taşınır.tank foreign smell and should not be stainless v:

TRANSPORT PROPERTIES

should move a product other than vegetable oil, the tank should be stainless steel tanks .

foreign taste - smell in the car, chemical contamination , visual pollution , should not be dead and alive insects

Vehicle foreign material (glass , etc .) Should not be

Product protected from sunlight , odorless, isolated chrome or food should be stored in appropriate tanks

NOTE:

Refined canola oil shelf life of two years
